Do you need a refill on any routine medications or prescription diets today? Yes \_\_\_ No \_\_\_

Has your pet ever had any reactions to any medications or vaccinations in the past? Yes \_\_\_ No \_\_\_

Are you interested in Wellness Blood testing for your dog today to fully assess his/her health? This is similar to the bloodwork you have at your own annual physical and helps identify hidden problems that may not be apparent on the physical examination. The ideal time to draw this is when we are taking blood for your heartworm test. This is especially recommended for dogs 6-7 years of age and older but is beneficial for dogs of any age. It is particularly important if your pet receives any chronic medications including but not limited to NSAIDs (Rimadyl, Metacam, etc), anticonvulsants (Phenobarbital) and heart medications (Salix, enalapril). This testing includes a complete blood count (to check for anemia and infections) and a blood chemistry (which checks kidney function, liver function, for diabetes and many other illnesses). The cost is only \$139.50. This is a savings of over 40% on the normal testing fees and includes FREE blood collection and sample submission.

Yes, tell me about Wellness Testing \_\_\_\_\_ No, I am not interested \_\_\_\_\_
